About Me

Fresh out of the university searching for the first step into my technological career. My latest interest is design and animation of scalable vector graphics using Adobe Illustrator and After Effects and their integration into web designing and development using CSS and Javascript.

I understand I do not have much experience but I am trying to make up to that with personal projects to keep my skills sharp and develop new ones. I keep up to date with the latest trends, and I always have an open minded approach to everything. Hence why my dissertation was based on decentralised, distributed networks.

I am currently working on developing my personal website in Laravel, as a means of showing what I am capable of doing with my current experience. I plan to go back to using GitHub for personal projects and work, as it is a mean for potential employers to have a look at my work as well as for people to perhaps get ideas from my work.

Work Experience

Student AV Support | University of Liverpool | March 2018 - June 2018
> Providing technical support using University systems/equipment
> Daily check of University equipment and computers
> Responsible for the maintenance and upgrade of certain building equipment

Skills & Frameworks

Current/Active
Laravel
> HTML | Css | PHP | JavaScript

Adope Illustrator/After Effects
>Vector Design/Animation

Remix
> Solidity

Previously worked with
Atom(Text Editor)
>C | C++

Eclipse
>Java

Databases
>MySQL

Education

Bachelor in Computer Science
University of Liverpool

Thesis Project **(First class)**:
> Decentralized Rental Agreement based on Smart Contracts and Blockchains

Year 3 [**Lower Second Class**]:
> Software Engineering II | Efficient Sequential Algorithm | Technologies for E-Commerce

Year 2 Modules [**Upper Second Class**]:
> Scripting Languages | Advanced Object Oriented Programming | Artificial Intelligence

Year 1 Modules [**First class**]:
> Human-Centric Computing | Operating System Concepts

Languages

Greek — 100%

English — 95%

Hobbies

> Exploring new locations
> Researching upcoming technologies
> Trading cryptocurrencies
> Dancing Salsa
> Extreme Sports - Skydiving

Personal Traits

> Sociability
> Positivity
> Honesty
> Creativity
> Adaptability
> Rationality
